Junior Software Developer with a passion for travel, learning and self development. Through my diverse professional background across multiple industries and countries I am highly adaptable to new situations. Being most successful and driven when working in a fast paced, international environment. Having found a passion for software development I am motivated by the endless potential for growth and innovation within the tech industry and eager to join a dynamic team, to take on new challenges, learn from and collaborate with experienced professionals and contribute to building high-quality software solutions that meet the needs of users.

Experience & Work History

Trainee Software Developer| *Northcoders Full-Stack Bootcamp*|| Jan 2023 - Apr 2023

During this rigorous 13 week course I learnt the fundamentals of back-end and front-end web development using TDD and agile development processes. I was exposed to a variety of paired and individual programming challenges that allowed me to develop my ability to utilise documentation and problem solving skills to complete tasks.

Group Project.

Application of React Native and MongoDB integrated with Google Maps and Chat GPT API's to create a travel route and itinerary planning application.

Individual Project:

Built a CRUD application using SQL to deal with requests and queries and the user interface using React to search, read and comment on news articles.
